Remote & Willing to Relocate

SUMMARY

I am a **passionate developer, a lego fan** and a **coffee lover**.

For the past few months, in my daily tasks, I've been using Javascript and React. I usually do Front-End development with React, Redux, SCSS, Javascript and a little of Jest. But, usually my side projects include Ruby on Rails, Django and, even, Ionic.I used to work with other popular frameworks (Vue, Angular & AngularJS) always with Ruby on Rails or Django as Server side framework.

My last works were as a: **Frontend Dev (ES6+ & React), Full-Stack Dev (RoR & Vue, also a little of Angular),** Web Mobile, a little of Automation, tests and CI/CD**.**

WORK EXPERIENCE
FrontEnd Developer

Beetrack | Oct 2018 - Present.
I've been working in core libs which will be used through the different services of the application. Also, working in small open source libs, new features, new modules and even remaking old modules. Most of the work is focus on maps and interactions.

Business Developer

Platanus | Sep 2017 - Oct 2018
Worked in up to 8 different projects, of different natures: open source, internal projects and external clients. Changed between Web Mobile / Frontend / Backend / FullStack.

I also learnt a bunch of new technologies/concepts like CI/CD, quality code and standards, etc.

Web Developer & Architect (Freelancer)

Datos MEG | Sep 2015 - Present. Part-Time
Working in a Web & Web Mobile app with a RESTful API server. I'm working as a developer / admin of multiple servers / architect / UX developer / software designer. I'm like a Ninja Developer.

Developer [0], Scrum Master [1], Technical Lead [2]

Cleteci | 0: Sep 2014 - Dic 2015; 1: Jan 2016 - Jan 2017; 2: Feb 2017 - Aug 2017
Mentoring up to 9 developers, reviewing code and supporting them. Supporting QA team fixing issues related to next release and production. Investigation of new tools & technologies to improve the quality of the environment, code and product. Defining higher standards for code, product & documentation. Supporting thirds companies integrations. Continuous working on refactoring.

Developing new features on RESTful APIS with clients applications and classic web applications.

EDUCATION
Computer Engineer

Simón Bolívar University | Sep 2007 - Nov 2015
Internship: Web system for AtrioSeguros Agents (Insurance Company) - **with Honors**
Specialization: 1. Databases, **2.** Computer Graphics & **3.** Software Development Workshop: A Medical Emergencies Software, iTriage - Current Version.
Electives: 1. Mobile Development, **2.** Software Methodologies, **3. & 4.** A.I. on Robotics and on Video Games, **5.** Computer Graphics on Video Games & **6.** A.R.
