SUMMARY

I am a ***passionate developer*** and a ***coffee lover***.

As a developer, I have experience in back-end and front-end. I am interested in learning new technologies. I like to follow the best practices of each new language or framework. I enjoy front-end development, working with good eye for details and working for a good look and feel & UX. Also, I really like to work back-end. So, I can work full-stack.

My last works were in: **Front-End & UX, Back-End, Web Mobile, a little of Automation & Admin.**

WORK EXPERIENCE
Web Developer & Architect (Freelancer)

Datos MEG | Sep 2015 - Present. Part-Time
Working in a Web & Web Mobile app with a RESTful API server. I'm working as a developer / admin of multiple servers / architect / UX developer / software designer. I'm like a Ninja Developer.
